

Transform business phones into a omni-channel engagement platform

To improve customer engagement in today’s mobile world, you need to move beyond basic voice communications. With Atmosphere® Messaging, you get a cost-effective, omni-channel communications solution that combines voice and messaging under one phone number.

Send and receive SMS messages

Leverage our APIs to easily configure your Direct Inward Dialing (DID) and Toll Free numbers to send and receive SMS messages. Discover the benefits of Short Codes, 5 to 6 digit numbers that allow customers to opt in to a database and make it easy for you to send bulk SMS messages to your audience.

You’ll have access to full API documentation, as well as regulation and best practice information to get you up and running quickly. You can also easily integrate and automate messaging into your business workflows with our other Atmosphere® CPaaS applications.

Create more effective customer interactions

There are countless ways that incorporating messaging into your communication strategy can improve internal processes and enhance the customer experience. Provide sales, marketing, onboarding, and support teams with an effective method of automating processes and creating conversations throughout the customer lifecycle.

For example, sales representatives can cut through the clutter and reach customers on their mobile phone. Take advantage of Short Codes with banking notifications, appointment reminders, or alerts. Marketing teams can also respond to customer inquires and send out messages with product and promotional information with Short Codes. Contact center agents can support customers via text, letting the customer go about their day without waiting on hold while the issue gets resolved.
