

## Build engaging and effective voice and messaging campaigns

Atmosphere® Engage is a simple and effective way to manage, execute, and measure SMS and voice campaigns with your contacts. With pre-built templates and flows, marketing, billing, sales, operations, and human resources teams can build campaigns and manage the process all in one place. From uploading your lists and crafting your message to scheduling your outreach and measuring results, this ready-to-use application allows you to focus less on the technical side of building campaigns, and more on engaging with your target audience.

## Upload lists to target audiences and schedule outreach

Atmosphere® Engage simplifies the administrative process of uploading your contact lists. You can schedule your campaigns for specific dates and timeframes so you have more control over the customer journey. Reach the right audience, at the right time, with the right message.

## Customize and control your interactions

It's becoming more and more difficult to attract the attention of your prospects and contacts. So, it's important that your outreach is timely and precise. Pre-built templates and flows allow you to concentrate on the big picture and execution rather than on backend programs. This means you can keep your focus on your messaging and scheduling rather than spending time or resources on coding. Simply craft your message using SMS text, audio files or text-to-speech for voice. Engage will help streamline the rest.
